

Learning objectives:

1. The participant will learn the core elements of the clinical presentation of child sexual abuse and how to respond.
2. The participant will develop an understanding of the component parts of a medical examination when sexual abuse is of concern.
3. The participant will enhance their level of comfort with engaging children in conversation about Okay and not Okay experiences.
4. The participant will develop an appreciation of the spectrum of normal and concerning sexual behaviors in children.
5. The participant will learn how to incorporate anticipatory guidance for the primary prevention of child sexual abuse as a component of routine pediatric care.
