The American Professional Society on the Abuse of Children

23rd Annual Colloquium

BOSTON, MA
The Westin Copley Place

July 22 – 25, 2015
Welcome to the 23rd Annual APSAC Colloquium!

Our vision is for a world where all maltreated or at-risk children and their families have access to the highest level of professional commitment and service. Our mission is achieved in a number of ways, most notably through expert training and educational activities, policy leadership and collaboration, and consultation that emphasizes theoretically sound, evidence-based principles.

Come join us in the celebration of this vision and commitment to supporting and training professionals who serve children and families affected by child maltreatment and violence. Through the hard work and dedication of our members, APSAC has grown into a multidisciplinary group of professionals, who also are our friends, family, colleagues and the leading experts on the prevention and intervention of child abuse in the United States.

Please join us in Boston July 22 - 25, 2015.

Frank Vandervort, J.D.
APSAC Board President

About the Colloquium

This year we offer 84 institutes and workshops which address all aspects of child maltreatment, including prevention, assessment, intervention and treatment with victims, perpetrators and families affected by physical, sexual and psychological abuse and neglect. Cultural considerations will also be addressed.

The educational goal of APSAC’s Colloquium is to foster professional excellence in the field of child maltreatment by providing interdisciplinary professional education.

Upon completion of this activity, participants should be able to:

1) Identify physical abuse, sexual abuse and neglect in children
2) Treat abused and neglected children
3) Apply model examination techniques for assessment of abused/neglected children
4) Describe and utilize the most up-to-date information concerning working with abused and neglected children to improve patient care
5) Prepare and report quality testimony in court cases, both as experts and as witnesses

Workshops have been designed for professionals in mental health, medicine and nursing, law, education, prevention, law enforcement, research, advocacy, child protection services, and all who serve children and families affected by child maltreatment and violence.

2. **The Whole Truth About Abusive Head Trauma**
   This presentation will begin with a discussion about the state of medical science in abusive childhood head trauma and false controversies raised by irresponsible experts. The afternoon will include a presentation on ethical standards for expert testimony by physicians and end with a roundtable discussion of potential solutions to the problem.
   Rab Parrish, J.D.; Lori Frasier, M.D.

3. **The Mystery of Risk: Drugs, Alcohol, Pregnancy and the Vulnerable Child**
   This session will focus on the structural and functional changes that occur in the fetal brain due to prenatal exposure to alcohol and other drugs and postnatal exposure to trauma; how those changes interact with environmental issues to affect the child’s ability to attach to their primary caregiver; how multiple risk factors impact the child’s long term behavior; learning, and social/emotional outcomes; and strategies for intervention and treatment that can improve the child’s long term outcome.
   Ina J. Chasnoff, M.D.

4. **Forensic Interviewing Institute**
   **8:30 – 12:00**
   The Link Between FI’s and Children’s Testimony in Sexual Abuse and Criminal Violence Cases

**Assessing Child Maltreatment in Multicultural Populations/Minority Religions and Child Maltreatment**
As the United States becomes increasingly multicultural, religious rites and cultural practices can be reported as suspicious for child maltreatment.
